Music 254/CS 275b

Music Query, Analysis, and Style Simulation

- 2–4 Credits
- MW 1:15–3:05, Braun Music Building 128
- Eleanor Selfridge-Field (esfield @ stanford.edu)
- Craig Sapp (craigsapp @ stanford.edu)
- Website: http://music254.stanford.edu (http://254.ccarh.org)

- Grading: 25% class participation, 75% project
- Deadlines:
  - Project proposal, 3 pages, Wed. 17 April 2013 (end of week 3)
  - Project presentation, 20–30 minutes, Wed. 5 June 2013
  - Project writeup draft, 5+ pages, Wed. 5 June 2013
  - Project writeup, 10–20 pages, Wed. 12 June 2013

- First month: concentration on Humdrum data and tools:
  - harmony, melody, rhythm, regular expressions, data conversion
- Second month: concentration on project research/development
  - Literature reports & project updates by students

Class info (2)

- No class on May 20 & 22 (and possibly 27th)
  - Music Encoding Conference, Mainz, Germany
  - http://music-encoding.org/conference/program

- ISMIR paper deadline: 10 May 2013 (http://www.ppgia.pucpr.br/ismir2013)
- ICMC (http://icmc2013.com.au) August 11-17 (submission date passed)
- ACM various conferences (http://www.acm.org/conferences)

- Josquin Research Project concert and workshop (13 & 14 April)
  http://music.stanford.edu/Events/josquin.html
  Sign up if interested in attending workshop.
- Project idea: style analysis in early Renaissance music (http://jrp.ccarh.org)

Harmony Tools in Humdrum

craigsapp@stanford.edu

1/3 April 2013

1. Intervals

hint: harmonic intervals

2. Chords

tntype: sonority types

3. Key

key/**keycor**: musical key by correlation

hint

```
humcat h://371chorales/chor001.krn > chor001.krn
hint chor001.krn > hint.txt
assemble chor001.krn hint.txt > chor001.hint
```

(Save a local copy of chorale 1)

(Save output from hint)

(Merge hint data with original score)

```

Humdrum program documentation

hint –h	gives one-page summary of *hint* command (similar for all Humdrum Toolkit programs)
serialize --options	list options for serialize command (same for all Humdrum Extras programs)

Humdrum Toolkit man pages:
http://www.humdrum.org/Humdrum/commands/hint.html

Humdrum Extras man pages:
http://extras.humdrum.org/man/serialize

Chapter 15 in the Humdrum Users' Guide (Harmonic Intervals):
http://www.humdrum.org/Humdrum/guide15.html

List of various Humdrum resources:
http://humdrum.ccarh.org

hint -a

- -a option shows intervals for all note permutations, not just “stacked intervals”

```
hint –a chor001.krn > hinta.txt
```

```

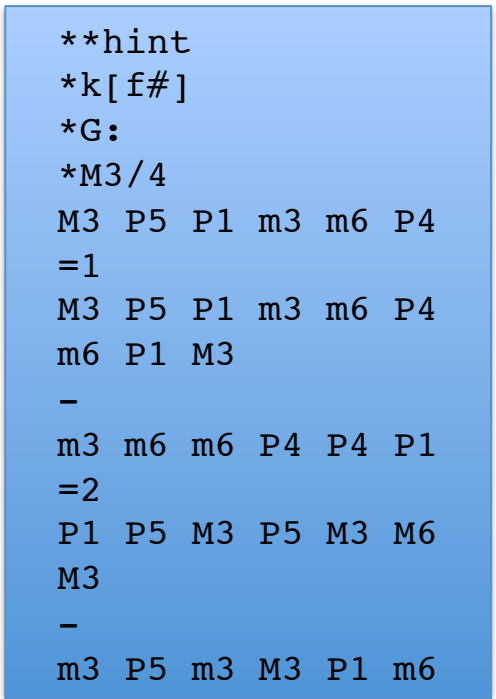
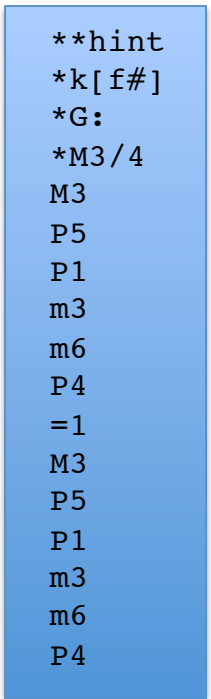
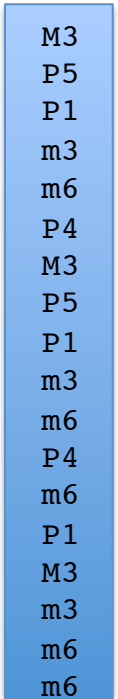
Most common harmonic interval

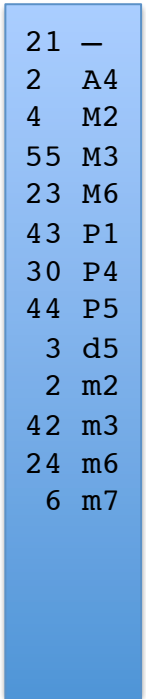
hint –ac chor001.krn | serialize –c | ridx –H | sort | uniq –c | sort -nr

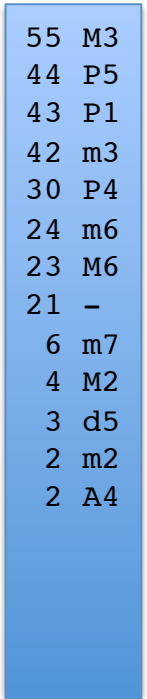
1. hint –ac chor001.krn: do harmonic interval analysis (Humdrum Toolkit)
2. serialize –c: force intervals one to a line (Humdrum Extras)
3. ridx –H: remove Humdrum file structure from data (Humdrum Extras)
4. sort: sort lines alphabetically (Unix)
5. uniq –c: output lines without repetitions, counting occurrences (Unix)
6. sort –nr: sort numerically, in reverse order (largest count first) (Unix)











ditto

- *hint* ignores null tokens, resulting in harmonic intervals between note attacks only
- To also include intervals to sustained intervals from previous attacks, use *ditto*
- This fills in the null token with the continuing data token it represents

ditto chor001.krn

tntype

Tool for generalized description of sonority types (pitch-class sets sounding together)

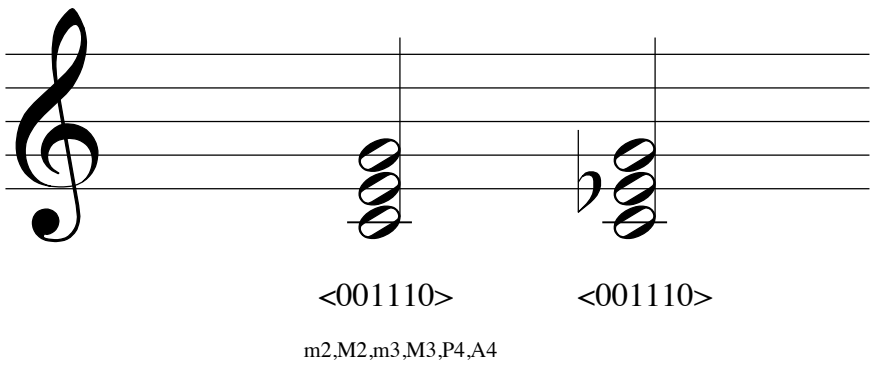
documentation: http://extras.humdrum.org/man/tntype

similar to Humdrum Toolkit command pcset http://www.humdrum.org/Humdrum/commands/pcset.html

seven successive “sonorities” present in the above music:

Interval vectors

- Similar data generated by *hint*, but more compact



- Major and minor triads have the same interval content: m3, M3, P5
- <001110> is can be represented by the Forte number enumeration 3-11.
  - 3 = three pitch classes in set
  - 11 = 11th most compact organization of 3 pitch classes

    3-1 = c,c#,d 3-2 = c,c#,d# 3-3 = c,c#,e 3-4 = c,c#,f 3-5 = c,c#,f# etc.

tntype -d

Generate a **dpc (diatonic pitch-class) spine listing unique pitch classes in sonorities

tntype –ad file.krn

```
**kern   **kern   **kern   **kern   **num   **dpc

Bach chorale sonority types

- Are there more major or minor sonorities in Bach chorales?

By musical description:

```
humcat -s h://371chorales | tntype -D | ridx –H | sort | uniq -c | sort -nr
```

By Forte number:

```
humcat -s h://371chorales | tntype | ridx –H | sort | uniq -c | sort -nr
```

- What is the most common 7^{th} chord sonority?

sonority

- similar to tntype program but has more triad-centered descriptions of sonorities

http://extras.humdrum.org/man/sonority

sonority -a h://371chorales/chor001.krn

Starting/Ending sonority

- Do Bach chorales start and end on the same sonority?
- How does the starting/ending chord root relate to the key of the chorale?

humcat -s h://371chorales | humsplit

```
#!/usr/bin/perl

@filelist = @ARGV;

foreach $file (@filelist) {
   processFile($file)
}

sub processFile {
  my ($file) = @_;
